Johor Bahru, Malaysia (Open to Singapore) | foochenxuan@gmail.com | +60 11-2614 9019 | [LinkedIn](#)

SUMMARY

Business Analyst and Software Support professional with hands-on experience in ERP systems, CRM management, and business process analysis. Skilled in requirements gathering, stakeholder coordination, and technical troubleshooting, with working knowledge of SQL Server (MSSQL), data migration, and data integrity.

TECHNICAL SKILLS

Business Analysis & Support: Business Process Analysis, Requirements Gathering, Functional Specifications, User Acceptance Testing (UAT), Stakeholder Management, Customer Requirement Coordination, Problem Solving, Incident Troubleshooting, User Training, Technical Support

CRM & Data: CRM Management, MSSQL (SQL Server), Data Migration, Data Integrity, Database Design, Data Analysis, Crystal Reports

Systems & Tools: ERP Software, System Configuration, AWS (Basic), Git / GitHub

Development Exposure: C++, Web Application Development, Mobile Application Development, Visual Design

WORK EXPERIENCE

Property213 - Software Support Executive (Property Agency-Tailored ERP Software) April 2026 - Present

- Gather and coordinate requirements directly with customers, translating business needs into functional system configurations and enhancement requests
- Manage the CRM module to support customer relationship tracking and account data accuracy, maintaining 40 customers account and resolve 25 tickets and 3 sales orders monthly.
- Troubleshoot and resolve client-reported system issues, drawing on in-depth product knowledge
- Deliver user training and onboarding sessions to clients, demonstrating thorough understanding of the company's ERP product and supporting smooth adoption

Greenstem Business Software SDN. BHD. - Technical Support Intern Nov 2024 - May 2025

- Coordinated with clients to gather requirements for report customisation using Crystal Reports and MSSQL (SQL Server)
- Implemented e-invoicing features and validated data fields (TIN, registration number, UUID, QR Code) for regulatory compliance
- Performed data migration between systems, running SQL queries to map, validate, and ensure 100% data accuracy and integrity during integration
- Supported e-commerce platform stock data integration, testing, and maintenance

KEY COMPETENCIES

Data Migration

- Migrate data across formats into MSSQL databases while ensuring data accuracy and consistency
- Coordinate with stakeholders to define and validate data requirements prior to system integration

E-Invoice

- Understand how e-invoicing works end-to-end and how it integrates with accounting systems, including mapping invoice data to financial records
- Familiar with the e-invoice submission process, including common failure patterns and how to identify and resolve recurring submission errors

Accounting Knowledge

- Understand the end-to-end accounting document flow within ERP systems, including invoices, receipts, payments, credit notes, and debit notes
- Able to trace how transactions move through the accounting cycle to support client troubleshooting and system configuration

Music Player (Self Project)

- Identified a recurring pain point on the treadmill: unskippable ads on YouTube Music kept breaking workout flow
- Built a self-hosted, ad-free player integrated with Google Drive, enabling uninterrupted background and lock-screen playback

EDUCATION

Bachelor of Software Engineering (Honours)

July 2022 - May 2025

Tunku Abdul Rahman University of Management and Technology

Secondary School in Art & Commerce

Jan 2016 - Dec 2021

Foon Yew High School
